Autoflame has partnerships with more than 60 technology centres worldwide. To maintain our reputation for quality, safety and reliability, Autoflame ensures they receive regular training to keep up to date with our latest innovations.

Complete Support

Autoflame focuses exclusively on boiler/burner combustion management systems. As a result, our range of additional services have evolved around meeting the unique needs of this market:

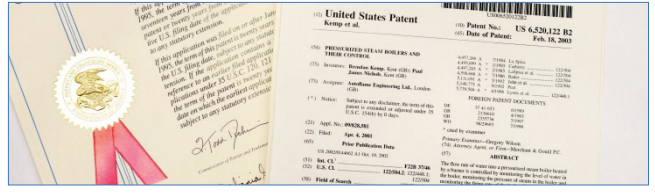

Technical Support

You are always just minutes away from talking on the phone to a trained engineer in our Biggin Hill, England, headquarters. We pride ourselves in responding to all technical emails within one business day, and usually within the same day.

Systems Customisation

Many of our innovations spring from meeting the unique requirements of our thousands of customers around the world. Come to us with unusual situations and we can often work out a solution together.

Innovation

Autoflame has recently introduced the Mk8 EGA and the Mini Mk8 Controller. Our EGA, DTI and MM Controllers all have advanced touchscreen interfaces. Unlike competitors, our entire R&D budget is focused on Boiler Management Systems. By aligning with Autoflame, you are partnering with a company that will support you with the latest innovations in the boiler management industry.

Flexibility

After more than 40 years, we have earned our reputation for reliability and consistency across a broad spectrum of applications:

- We have long-standing partnerships with OEM's including Faber Burner, Hurst Boiler, John Zink, Johnston Boiler, Limpsfield Engineering, Powerflame, St Johnson, Webster Engineering and Weishaupt.
- We have more than 60 service centres (we call them Technology Centres) worldwide.
- We have on three occasions won the British Queens Award For Enterprise.
- We are the worldwide Vendor of Choice for a Fortune 100 microchip manufacturer.
